I just had an NIH grant rejected by CSR prior to review because a figure legend creeped into the 0.5in margin. I wish NIH had other things to focus on than page margins, but be careful!

Because of $SAVA whales' connections at the NIH. The email correspondence between NIH staff and Lindsay is quite interesting. No wonder the whales lawyered up immediately after CP became public. N sets of white collar crime defense lawyers.

You underestimate US government incompetence and how little most clinical psychologists know about biochemistry. There is no need for conspiracies.
